

Geography: My Borders

1. Learn: What is a Border?

A **border** is a line that shows where one place ends and another begins.

The black line is the border. It keeps the house separate from the park.

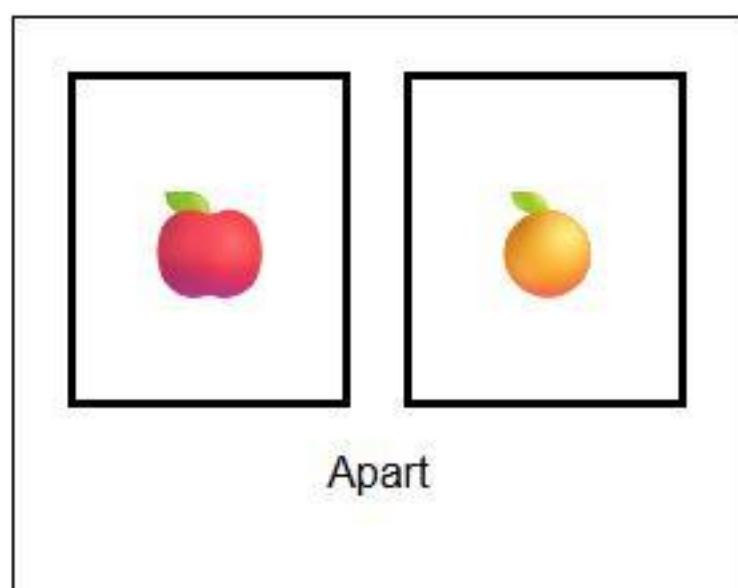

2. Activity: Trace the Border

Use a crayon to trace the dashed line. This is the border of the Country of Stars.

3. Activity: Find the Neighbors

Neighbors are places that touch each other. Their borders meet. Circle the map below where the states are touching.

4. Activity: Inside or Outside?

Draw a circle around the animal that is **INSIDE** the state border.
